eco ANIMAL BEDDING

100% RECYCLED HIGH QUALITY DUST FREE CARDBOARD & PAPER FULLY BIODEGRADABLE & COST EFFECTIVE

- ◆ Give your racehorse, stud or livestock the winning advantage with a healthy **dust free** environment
- ◆ An environmentally friendly alternative to the traditional wood shavings and straw
- ◆ Highly absorbent: holds up to three times its weight in water
- ◆ Virtually odour free: cardboard corrugation enables urine to flow through to the floor allowing absorption from the bottom up
- ◆ A healthier, cleaner alternative free from seeds, fungal spores, and toxins
- ◆ Excellent for allergy sufferers (people and animals) and horses with COPD or respiratory problems such as heaves
- ◆ There are no small particles, husks or hulls to stick to the animals' fur or coat
- ◆ Outstanding thermal insulation qualities enabling animals to keep warm, dry and comfortable
- ◆ Provides a sterile environment for horses recovering from surgery or major tendon injuries
- ◆ Has been utilised in the UK and Europe for the past 26 years
- ◆ Cardboard chips and shredded paper available in 20kg bales
- ◆ Used bedding can be applied direct to land for composting and is an excellent soil fertiliser

eco ANIMAL BEDDING

100% RECYCLED HIGH QUALITY DUST FREE CARDBOARD & PAPER

Here are a few testimonials from users of this product from around the world.

A Superior Bedding

We have been using cardboard bedding for several years now and feel it is superior compared to other traditional bedding materials. We especially like it for foaling out our mares and simply can not be without it for our newborn foals and youngsters!
Chase Arabians, Aubrey, Texas

The Winning Advantage

My idea of good bedding is one that is not dusty, absorbs well, is easy to compost and is packaged in a manageable size to take to the horse shows. Dust is a major issue with me, since several problems such as upper respiratory problems and colic stem from a dusty environment, not to mention making the barn very dirty as well. Absorption is also a necessity in a stable that is used primarily as a business where odours can be an issue. Being able to manage the bedding is important, which includes the ease of composting it. Lastly, the need to transport bedding to the horse shows with ease is essential, bedding should be easy to stack in the trailer and be packaged in a compressed form to utilise available space.

Surprisingly, my wish has come true, a bedding product that meets every expectation and more. It is a revolutionary bedding that is made from new corrugated cardboard cut into small chips, cleaned of all dust and packaged in a compressed fifty-pound bag. Overall, This corrugated cardboard gives me a winning advantage with a product that is easy to use and creates a dust free environment as well as countless other advantages.

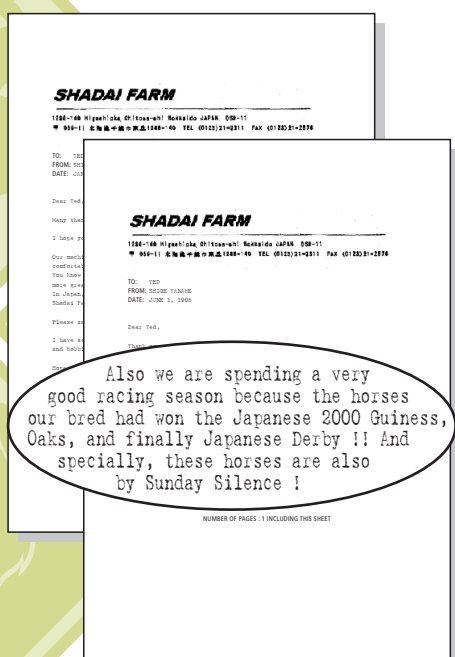

My World Champion horses stand on nothing but dust free, corrugated cardboard bedding. Thank you for this wonderful product that will help my business.

Sincerely, David M. Riddle, World Class Horses

A Successful Racing Season

The horses be clean and comfortable on their bedding. We had a brilliant racing season last year and we are very happy. We are spending a very good racing season this year because the horses our bred had won the Japanese 2000 Guiness, Oaks, and finally Japanese Derby!! And specially, these horses are also by Sunday Silence!

Shigehisa Tanabe, Shadai Farm, Japan
